Summary

Data Analyst & Quality Assurance Specialist with 5+ years of experience improving data accuracy and process efficiency through data-driven insights. Proficient in Excel with growing expertise in SQL, Power BI, and Python for analytical validation, data transformation, and reporting. Skilled in identifying anomalies, optimizing workflows, and ensuring data integrity across large datasets. Collaborative and detail-oriented professional passionate about delivering actionable insights and continuous improvement in data processes.

Core Competencies

- Data Validation & Quality Assurance
- Data Analysis & Visualization (Power BI, Excel)
- SQL & Python for Analytics (Enhancing Expertise)
- Performance Testing & Automation
- Root Cause Analysis & Process Improvement
- Agile Methodologies & Cross-Team Collaboration
- Stakeholder Reporting & Insight Generation
- ETL Checks & Data Cleaning

Professional Experience

Order Management Analyst | British Telecom | Apr 2022 – Present

- Performed QA and analytical validation on order-management datasets, ensuring 98% transaction accuracy across large volumes.
- Built SQL queries and Power BI dashboards to analyze order trends and detect anomalies, reducing cycle time by 15%.
- Conducted root-cause analysis on order failures and presented insights to leadership, contributing to 10% cost reduction.
- Automated QA checks and reporting pipelines, saving 5+ hours per week and minimizing manual errors.
- Collaborated with cross-functional global teams to enhance data visibility and process quality.

Senior Associate | IBM Daksh | Mar 2017 – Jan 2018

- Executed QA validation and trend analysis on escalation data, achieving 90% resolution within SLA.
- Streamlined issue-tracking processes and built Excel-based dashboards, reducing reporting discrepancies by 30%.
- Provided data-driven insights for service quality improvements and performance reviews.

Associate Engineer | Wipro | Mar 2016 – Oct 2016

- Validated telecom data sets and optimized testing workflows to achieve 95% first-contact resolution.
- Enhanced data integrity through system audits and structured defect reporting.

Associate | Aegis Limited | May 2015 – Feb 2016

- Conducted data validation and billing accuracy checks that improved financial data quality by 20%.
- Ensured smooth customer resolutions with 95% accuracy through data-driven QA procedures.

Projects

- Healthcare Analytics: Validated and tested patient data for accuracy in diagnostic insights and reporting.
- Sales Performance Dashboard: Designed Power BI dashboard QA scripts to verify sales and KPI data.
- E-Commerce Data Analysis: Cleaned and validated transaction data using SQL & Python for trend analysis.
- Exploratory Data Analysis: Performed statistical tests to validate business growth and market insights.

Certifications

- Project Management Foundation – LinkedIn Learning
- Agile Methodologies – LinkedIn Learning
- Business Analytics Pro – MyCaptain
- Python for Analytics – MyCaptain
- SQL for Data Analysis – MyCaptain
- Power BI for Data Visualization – MyCaptain

Technical Skills

- Excel (Advanced)
- SQL (Intermediate)
- Power BI (Intermediate)
- Python (Learning/Intermediate)
- Data QA & Validation
